December 17, 2009

Queensland Mining Corporation Limited wishes to advise that the Company has today released a video recording of progress report.

The interview can be accessed through this [Interview Link](#) or via <http://www.queenslandminingcorporation.com.au/mediacentre.htm>

Attached is a summary of the interview with Managing Director Howard Renshaw

OVERVIEW

QMC's focus is on three projects in the Cloncurry region of North Western Queensland, namely Mt. Freda, Flamingo, and Morris Creek.

Mt Freda

QMC is encouraged by early indications from the important diamond drilling programme, with work underway to determine potential gold resources.

Flamingo

QMC has a drilling programme underway at Flamingo, with 18 holes completed to date. Results and visual assessments are very encouraging based on intersections of the potential copper and gold ore bodies.

Morris Creek

A drilling programme is underway at this copper/gold tenement. QMC is awaiting results.

Corporate activity

QMC plans to raise further capital in the near future as drilling operations continue into 2010 and the economic status of various projects is enhanced.

Outlook

QMC copper and gold projects have an open cut focus compared with costlier underground operations. This is an exciting time as QMC proceeds with its plan to unleash value for shareholders.
